

Development Economics

CEMFI

Monica Martinez-Bravo

Spring 2022

Class meetings: Thursday 15h – 16.30h
Friday 9.30 – 13h
Room 2 ¹

Office hours: By appointment

Email: mmb@cemfi.es

Course Description:

This course focuses on the understanding of the process of economic development. The central questions of the course are:

- 1) Why are some countries so much poorer than others?
- 2) What are the main barriers to the process of economic development?
- 3) What are the main barriers that prevent the poor from escaping from poverty?
- 4) Why do these barriers exist and persist?

The first part of the course (weeks 1 to 6) studies decision making by individuals and market failures as potential barriers to the process of economic development. The second part (weeks 7 to 10) of the course examines the role of institutions and political factors as determinants of underdevelopment. The purpose of the course is to give you a sense of the frontier research topics and a good command of the methodologies used in the field of Economic Development. The main emphasis will be in empirical and microeconomic studies, although some applied theory papers and macro analysis will also be discussed.

Previous knowledge: Students are assumed to be familiar with the basic concepts of econometrics, microeconomics, and macroeconomics. Some of the problem sets will require the use of Stata. A Stata tutorial is available on the Intranet. This tutorial covers a few basic commands frequently used in Stata. If you still find difficulty working with Stata you should talk to the Professor or Teaching Assistant.

Teaching assistant: The teaching assistant for this course is Christian Rosario Maruthiah christian.maruthiah@cemfi.edu.es. He will discuss problem set solutions during the first half of Friday's class on weeks when problem sets are due.

Grading: The final grade will be based on problem sets, participation, and exams according to the following weights:

Participation:	5 %
Problem Sets (7):	15 %
Final Exam:	80 %

¹ The regular schedule of the course will be modified during weeks 7 and 8. See the outline of the course below for more details.

Final Exam: The final exam will be a closed book exam that will take place during the exam week.

Problem Sets: There will be 7 assignments. All of them have to be handed in, however only the top 6 grades will be used to compute the average. Students will work in teams of 2 people and hand in a common set of answers. The group submission of the first assignment will define the teams for the rest of the term. There will be two types of assignments: 5 of them will consist on problem sets and will require reading in detail a paper and answering questions about the reading. A few problem sets will also require the replication of the empirical exercise of the paper. In addition to this, there will be 2 assignments consisting on writing a referee report on a research paper. Guidelines on writing these reports will be made available on the Intranet together with the research papers. Problem sets are a central part of the course and provide fundamental training for exams. You should devote a substantial amount of time and effort to solving the problem sets.

Submission Deadlines and Instructions:

- Regular problem sets are due 30 min before the class, led by the TA.
- Referee reports are due 24 hours before the class led by the TA. The TA will aggregate some of your answers and prepare the discussion for the Thursday lecture.
- Please submit PDFs with your answers to the problem sets through the intranet.
- All members of the team need to submit the same document through the intranet (this is to ensure the system records that all students submitted answers).
- See the schedule part of this syllabus for specific deadlines by week.

Discussion of Problem Set Solutions: On weeks when problem sets are due, the first half of Friday's session will be typically devoted to discussing the problem set. Check the schedule on the next page from possible deviations from this schedule.

Participation: Students are expected to participate in class by asking questions and to contribute to the discussion during the problem set sessions. Attendance in all lectures is mandatory and will be a key component in the participation grade.

Readings: The reading list is intentionally long to give you an opportunity to dig deeper into the topics you find most interesting. Readings marked by *** are required, by ** are strongly recommended, by * are recommended.

Course Material: All the readings, slides, handouts, problem sets etc. will be uploaded in Intranet throughout the course. The only exception is slides of problem set sessions, which will not be made available. Please, do not share the course content with other people.

Books: There is no textbook for this course. However, several readings of the book *Poor Economics* (by Banerjee and Duflo) are strongly recommended.

General Readings:

Banerjee, Abhijit V. and Esther Duflo (2011) *Poor Economics: A Radical Rethinking of the Way to Fight Global Poverty*. Public Affairs, First Edition, New York, NY. **[BD henceforth.]**

Bardhan, Pranab and Christopher Udry (1999). *Development Microeconomics*. Oxford University Press.

Acemoglu, Daron and James Robinson (2012) *Why Nations Fail: The Origins of Power, Prosperity and Poverty*, Crown Publishers

OUTLINE OF LECTURES:

Week 1: Global Trends in Growth, Inequality and Poverty

Week 2: Health

Problem Set 1 due on Friday 9h

Week 3: Education

Problem Set 2 due on Friday 9h

Week 4: Land, Labor, Migration

Problem Set 3 due on Thursday 9.30h (referee report)

Week 5: Credit Constraints, Entrepreneurship, and Banking

Problem Set 4 due on Friday 9h

Week 6: Technology Adoption

Problem Set 5 due on Friday 9h

Week 7:

(No class this week)

Week 8: Institutions

Problem Set 6 due on Thursday 14.30h

(Extra class on Wednesday 17 – 18.30h; Problem set session will take place on Thursday 15 – 16.30h instead of on Friday).

Week 9: Corruption & Public Finance

Problem Set 7 due on Thursday 9.30h (referee report)

Week 10: Local Accountability

Week 1: Introduction & Global Trends in Growth, Inequality and Poverty

Trends in Growth, Inequality and Poverty
